ENGINEERED FOR STRENGTH, CERTIFIED FOR QUALITY

Plasson threaded fittings are manufactured from Polypropylene for increased strength and enhanced chemical resistance.

Plasson's range of threaded fittings are certified to AS/NZS 4129 and hold both ISO Type 5 and WaterMark licenses. Plasson threaded fittings are made to ISO 7.1 which is equivalent to Australian Standard AS ISO 7.1.

Male threads are tapered. Known as BSPT, these fittings are referred to as R threads in the standard. Female threads are parallel. Known as BSPP, these fittings are referred to as Rp in the standard. When these threads are screwed together, with the use of a jointing medium, typically Teflon thread tape, a seal is formed.

The enhanced stiffness of the Plasson Polypropylene threaded fittings ensures a good seal between the threads of the male and female parts.

In some applications products are designed with a BSP taper female thread, Rc, which is designed for sealing with a BSP taper male, R. Teflon tape or another jointing medium is required with this connection.

OTHER THREAD STANDARDS

Other thread types are found within Australia, usually in the hydraulic and gas industry.

The hydraulic industry often uses a "G" thread. While of similar form to the Rp thread, the "G" thread is designed to seal with an o-ring or washer.

NPT threads are often used in the Gas industry. The NPT thread has a thread angle of 55° compared with 60° of the BSP range of fittings. While it is common to interchange these threads it is not recommended.

Threaded Fittings

Body: Polypropylene, high-grade copolymer.

Reinforcing Ring: Stainless Steel.

Quality Certificates

Plasson fittings are tested and approved according to ISO 17885 (replaced ISO 14236), water and AS/NZ 4129.

Threads

All threads conform to ISO-7/1 (BSPT), BS 21 - 1973, DIN 2999, NEN 3258, AS 1722 Part 1 - 1975.

All internal (female) threads smaller than 3" are parallel (Rp).

All other threads (male and female) are tapered (R).

Plasson recommend the use of PTFE tape in threaded connections.

Installation

Before installation ensure that the end of the pipe to be inserted into the fitting is free of scratches and other imperfections and that both the pipe and the fitting itself are clean of sand, mud, stones etc.

Do not over tighten nut when closing. Never use wrenches or spanners with handle lengths longer than 46 cm - excessive torque during tightening can spread nut cone and result in pull outs. If fittings are reused, Plasson recommend replacing the grip ring with a new one.
